

Application No.: 10/706,346
Filing Date: November 12, 2003

AMENDMENTS TO THE SPECIFICATION

Please insert the following paragraph immediately after Paragraph [0053] of the application as originally filed.

[0054] FIG. 23E is a schematic view of another embodiment of a cannula having a redirecting tip deployed in a patient's vasculature.

Please insert the following paragraph immediately after Paragraph [0183] of the application as originally filed.

[0184] FIG. 23E illustrates another embodiment of a cannula 1002. The cannula 1002 is similar to the cannula 902 described with respect to FIGS. 23A-23B, except that cannula 1002 comprises a multilumen cannula. The multilumen cannula 1002 has a first lumen 1050 having a first distal end 1048, or inlet, and a second lumen 1004 having a second distal end 1008. The multilumen cannula 1002 is substantially similar to the multilumen cannulae described in connection with FIGS. 10, 11, and 18A-18B. The second distal end 1008 has a tip portion 906 as described above in connection with FIGS 23A-23B.
